"COLONY 7"™ UPRIGHT

1. GAME SET-UP

A. INTRODUCTION

TAITO AMERICA'S CORPORATION'S "COLONY 7"™ upright game is a skill-based video action game, designed for one or two players.

The object of the game is to defend "COLONY 7"™ which is the most distant earth deep space colony, and IT'S UNDER ATTACK. The colony consists of 3 fuel bases, a space port, laboratories, and a colony housing area. It is defended by 2 anti-matter cannons able to be aimed by the player on its computer generated sites.

"COLONY 7"™ is protected by an ion shield. This shield is blasted away in random chunks enemy fire. A bonus colony is awarded at one of two adjustable score levels.

When the player presses the "FIRE BUTTON" both cannons ignite into fiery anti-matter beams, these converge on the location defined by the site where the cannons were fired. The cannons beam moves rapidly across the screen to explode at the target.

The first wave of incoming ships consist of a fighter squadrom which accompanies a small mobile scout, an Advisor Ship, and the Cannon Bummer. When the scout is out additional fighters are continuously added. The scout remains high in the sky, has no weapons and a low point value. Bonuses will be accumulated upon defeat of a squadron. Bonuses are also awarded for remaining structures in the colony. Point values will increase with each subsequent squadron.

The fighters are equipped with plasma rockets, which they use to attack the colony. Their rockets have a limited range allowing the player to concentrate on the lowest fighter.

The player is aided by a deep space scanner capable of determining the number of remaining fighter in the squadron.

One "Eradicator" rocket will be provided as part of each colony. By using the "Eradicator Button" all the enemies on the screen at the time will be destroyed. Eradicators can be destroyed by the fire and will take with them adjacent gantry, which would have a score value if defended.

The "Cannon Bummer" will fly along the top of the screen randomly. If not destroyed, it drops bombs targeting at either cannon.

The "Advisor" ships will appear in all squadrons, randomly and only for a few seconds. The "Advisor" ships will score higher point value at the expense of the players defense.

Three Mega-Blasters will be provided as part of the colony. The Mega-Blaster Button fires one shot at a time from the cannon. When it reaches the target cross it splits into 32 bombs which destroy all enemies within a limited range. Each Mega-Blaster relies on a fuel base which can be destroyed by enemy fire.

EXTENDED WEAPONRY

When extended weaponry is desired additional coin(s) are required. Extended weaponry gives the players weapons a greater area of destruction.

B. GAME INSPECTION

TAITO AMERICA'S CORPORATION'S "COLONY 7"™ upright game is ready to play when received. However, careful inspection is necessary to insure your game is in perfect condition. Please verify the following before turning the game on.

- * Examine external parts for chips, dents, or broken parts.
- * Open the service door and examine the following:
 - * Plug-in connectors to make sure they are firmly seated.
 - * Speaker
 - * Player controls
 - * Printed circuit boards making sure there is no damage to the components.
 - * Check for loose foreign objects especially metal objects which may cause electrical problems.
 - * Fuses, making sure they are firmly seated in the holders.
 - * Coin Mechanisms

The Video Monitor is properly adjusted before shipping. If there are any adjustments necessary refer to our Video Monitor Manual (72-00003-001).

If problems occur or technical assistance is required, contact our Customer Service Department HOT LINE Toll Free 800-323-0666 (except Illinois). Illinois phone 312 981-1000 X215.

POWER REQUIREMENTS

TAITO AMERICA CORPORATION'S "COLONY 7"™ upright game is shipped ready for operation at 120VAC, 60Hz with a power consumption of approximately 250 Watts.

CAUTION

For safe operation it is recommended the cabinet be grounded. This game is equipped with a three conductor power cable. The third conductor is the ground conductor and when the cable is plugged into an appropriate receptable, the game is grounded. The offset pin on the power cable's three-prong connector is the ground connection.

LOCATION SPACE REQUIREMENTS

Depth - 35" (87.5cm)
Width - 24" (61cm)
Height - 68" (171cm)
Weight - 300 lbs.
Packaged Weight

C. GAME INSTALLATION

The following precautions should be followed when installing the game.

- * Avoid rough handling of the game, the picture tube is fragile.
- * Install the game on a level surface.
- * Avoid installing the game where it may receive excessive sunlight or heat, to prevent the game from rising internal temperature.
- * Do not install in a damp or dusty location.
- * For a short time after connecting the power to the game, the picture may be temporarily distorted.

D. DIP SWITCH AND VOLUME CONTROL SETTINGS

DIP SWITCHES

TAITO AMERICA CORPORATION'S COLONY 7"™ upright game provides the following option switches. See Figure 1. These option switches can be found on the Option Board, which is located on the inside wall of the cabinet.

- SW1 - Sets the initial number of colonies. The OFF position provides 2 colonies, the ON position provides 3 colonies.
- *SW2 - Sets the bonus level. The OFF position provides a low bonus level, ON provides a high bonus level. See Figure 1.
- SW3 - NOT USED
- SW4 - NOT USED

*NOTE TABLE 1 indicates the extended mode of operation which provides an increase in the power of the weaponry. When set for the extended mode of operation an additional coin must be deposited.

		2 COLONYS	3 COLONYS
Low Bonus Level	Norm.	20,000	30,000
	Ext.	40,000	50,000
High Bonus Level	Norm.	30,000	40,000
	Ext.	50,000	70,000

Table 1 Normal and Extended Bonus Levels

OPTION SWITCH & VOLUME CONTROL LOCATIONS

FIGURE 1

VOLUME CONTROL SETTING

The Volume Control is located on the inside frame of the coin door. See Figure 1. Volume increases when turned counterclockwise as indicated.

2. MAINTENANCE

All games require a certain amount of maintenance to keep them in good condition. A periodic check of mechanical controls would be beneficial to guarantee your game will be profitable.

A. CLEANING

The exterior of the game, all metal parts and all plastic parts can be cleaned with a non-abrasive cleanser. Caution should be used when cleaning the plastic, a dry cloth can cause scratches and result in a foggy appearance.

B. FUSE REPLACEMENT

This game uses six fuses, 5 are located on the Switching Regulator. See Figure 2 for size and part number of fuses. One fuse is located on the Power Supply itself.

C. VIDEO MONITOR REMOVAL

If you need to remove the video monitor, follow the instructions listed below:

CAUTION

It is recommended the game be left disconnected for at least one hour before removing the video monitor. This will probably discharge the video tube but EXTREME CAUTION is still necessary.

- * Remove power from the line voltage.
- * Disconnect the monitor cable connector.
- * Remove the wire cable clamp.
- * Take out the two side bolts, one on each side of the cabinet.
- * Remove the four mounting bolts and disconnect the green ground wire.
- * Slide the monitor out by pulling the monitor toward you.

CAUTION

Use extreme caution and do not touch electrical parts of the monitor yoke area with your hands or with any metal object in your hands! High voltages may exist in any monitor, even with power disconnected.

D. VIDEO MONITOR ADJUSTMENTS

TAITO AMERICA CORPORATION presently uses either a Wells-Gardner Corporation or Electrohome 19" color Video Monitor in the "COLONY 7"™ upright game. Refer to the Monitor Manual (72-00003-001) for your specific video monitor. Be sure to heed all the WARNINGS and CAUTION INSTRUCTIONS provided before repairing or replacing your Video Monitor.

E. FLUORESCENT TUBE REPLACEMENT

CAUTION

If you drop a fluorescent tube and it breaks, it will explode! PLEASE USE CARE WHEN REPLACING. See Figure 3.

- * Remove the three screws from the marquee bracket, being sure to hold the glass while removing the screws.
- * Remove the marquee glass and the fluorescent bulb is accessible.
- * With both hands turn the bulb toward you, carefully pull the lamp out of the lamp socket.

F. PRINTED CIRCUIT BOARD REPLACEMENT

You may wish to remove the "COLONY 7"™ upright printed circuit boards for replacement or service. See Figure 4 to remove the "COLONY 7"™ upright board set, unclip the top of the set, held in place by 3 small clips and lift the boards out of the wooden cleat at the bottom of the board set.

WARNING

This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause interference to radio communications. As temporarily permitted by regulation it has not been tested for compliance pursuant to Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference. Operation of this equipment in a residential area is likely to cause interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference.

40P	DF090024	Angle Pin Header, 40P
E1	AA017627	Connector Sticker, E1
J1	AA017639	Connector Sticker, J1
M	AA017647	Connector Sticker, M
P	AA017653	Connector Sticker, P
Q	AA017656	Connector Sticker, Q
D.P.	AA052575	Dip Switch, DSS3
T.S.	AA052578	Tact Switch
IS1	AA055786	IC-Socket, 16P
IS2	AA055787	IC-Socket, 24P
IS3	AA055812	IC-Socket, 40P
X-TAL	AA069606	X-TAL, 358 MHZ.
T.R.	AAT11034	Transistor, 2SC509-Y
L.E.D.	AAT12022	L.E.D. TLR102
ZD	AAT13039	Zener Diode, 05Z-6.8V
OP	AAT31060	IO Amplifier, LM383
HS	DR040001	Heat Synk TMM6030 Pan Head Screw, M3 x 6 Nut, M3
IC1	AAT32001	TTL-IC, 7400
IC2	AAT32006	TTL-IC, 7425
IC3	AAT32021	TTL-IC, 7432
IC4	AAT32039	TTL-IC, 7442
IC5	AAT32084	TTL-IC, 7405
IC6	AAT33005	KS-IC, 74LS04
IC7	AAT33009	LS-IC, 74LS08
IC8	AAT33097	LS-IC, 74LS139
IC9	AAT33164	LS-IC, 74LS257
IC10	AAT33221	LS-IC, 74LS395
PIA	AAT34014	PIA, 6821
CPU	AAT34018	CPU, 6808
IC11	AAT35016	D-A Converter, 1408L6S
IC12	AAT36051	C-MOS-IC, 4050B
IC13	AAT36068	C-MOS-IC, 4049
IC14	AAT36069	C-MOS-IC, 4069B
IC15	AAT36075	C-MOS-IC, 4068B
